Thursday, May 29 – People, Processes, and Technology

Thursday, June 5 – Launching, Optimizing, and Growing RPM

Thursday, June 12 – Billing, Coding, and Reimbursement,

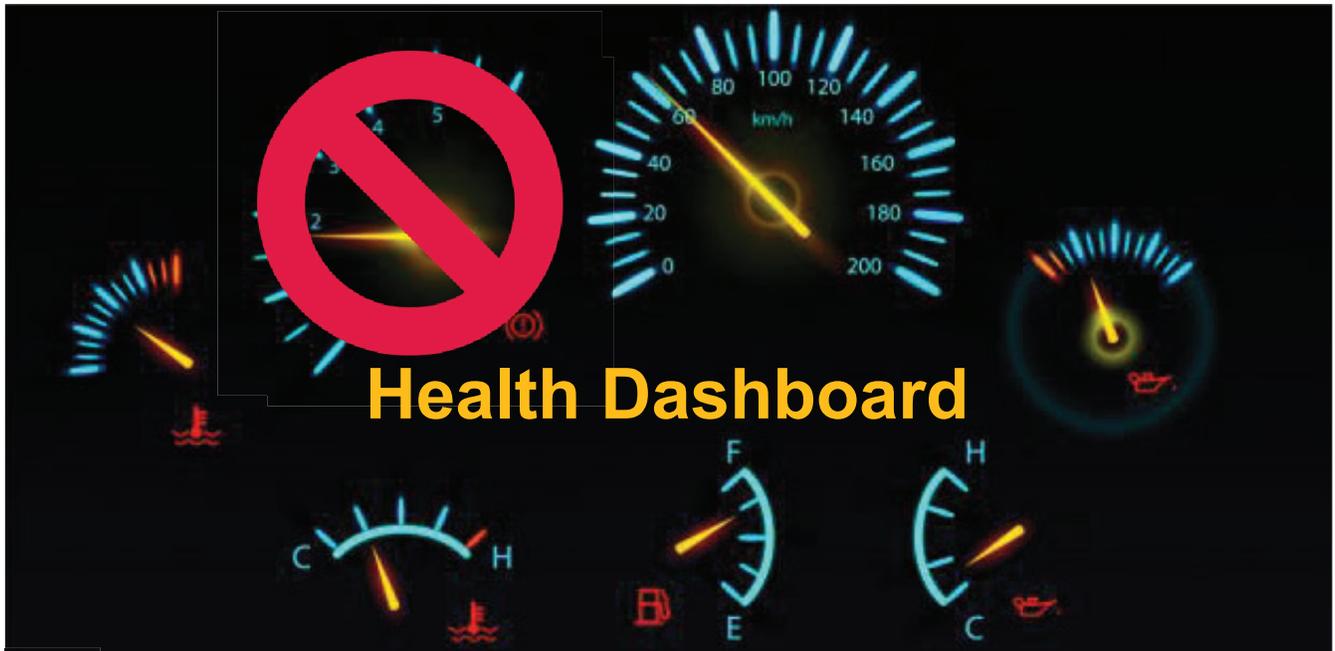

RPM OVERVIEW

6

(c) 2020-2025 by Ingenium Consulting Group, Inc.

R P M

Health Dashboard

RPM Definition

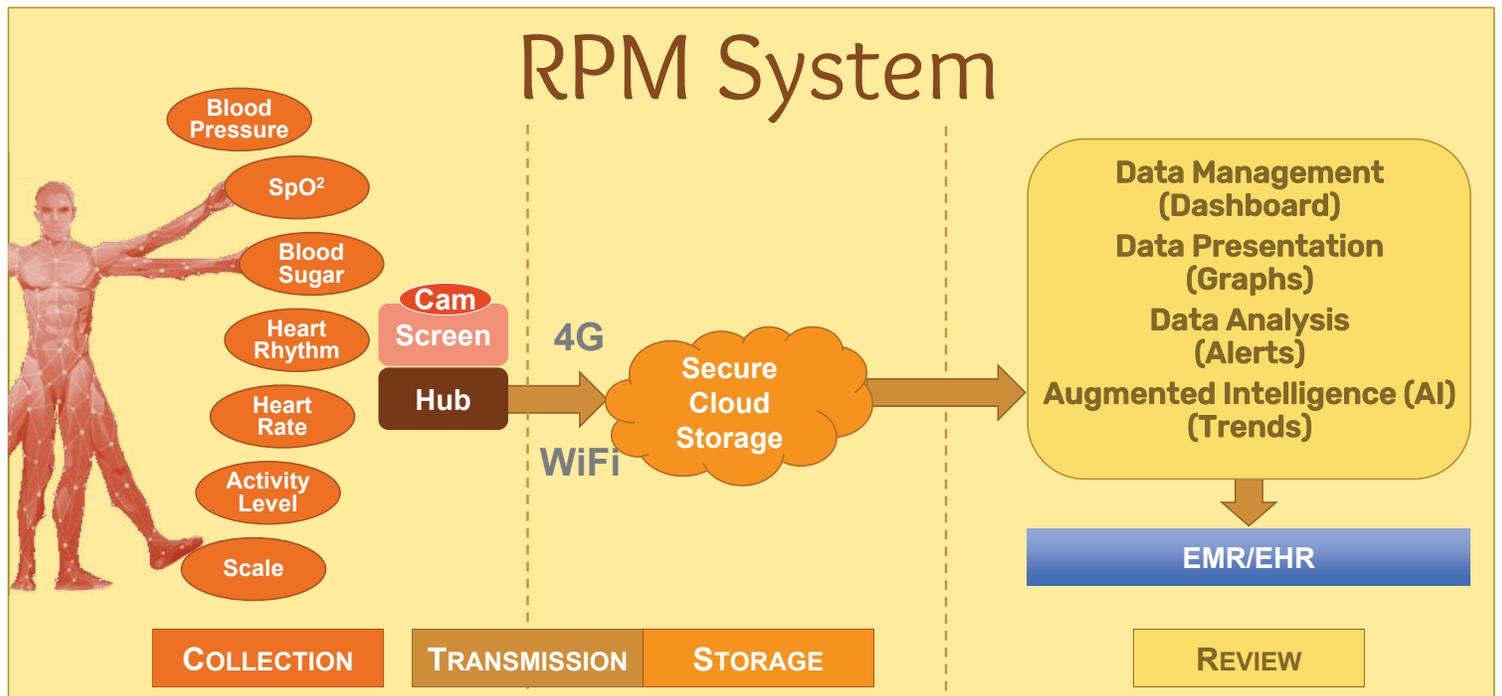

~~Revolutions per minute~~

Remote Patient Monitoring Remote Physiological Monitoring

The continuous or periodic collection, transmission and review of physiological data to inform care decisions.

(c) 2020-2023 by Ingenium Consulting Group, Inc.

(c) 2020-2022 Ingenium Digital Health Advisors

RPM APPLICATIONS

(c) 2020-2025 by Ingenium Consulting Group, Inc.

RPM Use Cases

❖ RPM in a Clinical Setting

- Intensive Care (eICU)
- Non-intensive Care (e.g., SNF)

❖ RPM in a Home or Home-like Setting

- “Hospital at Home” models (early discharge)
- Short-term readmission prevention
- Long-term chronic disease management
- Long-term disease onset monitoring (at risk pop.)

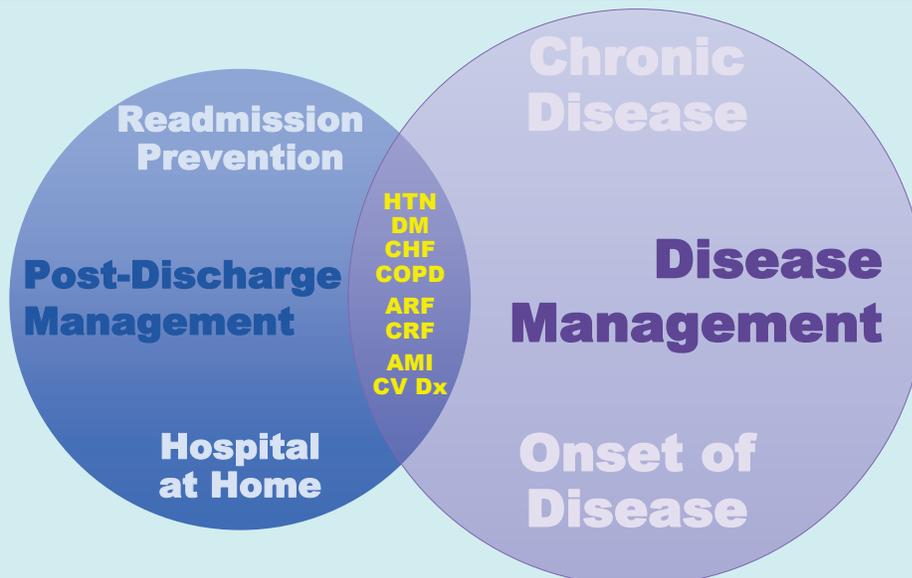

RPM Use Cases

(c) 2020-23 Ingenium Digital Health Advisors

Clinical Use Cases for RPM

(c) 2020-23 Ingenium Digital Health Advisors

RPM BENEFITS

(c) 2020-2025 by Ingenium Consulting Group, Inc.

14

RPM: Clinical Benefits

Clinical Care Quality

- ❖ Daily Insights allowing adjustment of the Care Plan
- ❖ With video capabilities, opportunities for interactive visits
- ❖ Better “exam” capabilities – not “flying in the dark”
- ❖ Establishing a Baseline to detect onset of disease

Patient Engagement

- ❖ “Seeing your body” increases patients' engagement
- ❖ Opportunities for Just-in-Time Education of patients

RPM: Community Benefits

- ❖ **Reduced Stress & Anxiety**
 - For spouses, children, care givers
- ❖ **“Functioning Members of Society”**
 - As parents, spouses, care givers
 - As church members, association members
- ❖ **Increased Workforce Productivity**
 - Fewer sick days / quicker return to work
 - Improved alertness

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2025 Ingenium Digital Health Advisors

RPM: Return on Investment

- ❖ **Reduced Health Care Costs**
 - Reduced readmissions (e.g., -53%, -60%, -67%, -71%, -75%, -82%)
 - Reduced skilled nursing visits (e.g., -40%)
 - Reduced emergency room visits
 - Savings for payer (e.g., \$1.9M)
- ❖ **More Engaged Patients**
 - Increased care engagement by 24 minutes/day
 - Early identification and treatment of disease exacerbation
- ❖ **Overall ROI**
 - e.g., up to \$14.50 for every \$1 invested (1,350% ROI)
(\$100k invested = \$1.45M return)

[1] Identification

1

❖ Inclusion/Exclusion Criteria

- Clinical, Physical, Cognitive, Environmental

❖ Workflow for HTN RPM:

- Pre-Identification – HTN Dx, other factors?
- Joint Decision – PCP, Pop Health/Care Coord.?
- Referral to HTN RPM Service

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2023 Ingenium Digital Health Advisors

Inclusion/Exclusion Criteria

1

Clinical Diagnoses

e.g., HTN Score
e.g., CV Risk Score

Home Assessments

Environmental
(e.g., tidiness)
Technical
(e.g., WiFi, cellular, outlets)

Patient Evaluation

Dexterity
Cognitive Abilities
Digital Literacy

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2023 Ingenium Digital Health Advisors

Inclusion/Exclusion Criteria

1

Environmental/technical

- Living at home
- Working phone
- Cellular coverage / Home WiFi

Physical Dexterity

- Ability collect the data

Cognitive

- Ability to follow instructions

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2023 Ingenium Digital Health Advisors

[2] Enrollment [3] Equipment Setup

2

3

Sample Workflow Steps:

- ❖ Establish patient in RPM monitoring system
- ❖ Prepare patient forms & documents
 - authorization agreement, consent form
 - patient competency assessment (“teach back”)
- ❖ Set up & test RPM kit at patient’s home
 - Checklist: contact info, record serial numbers, etc.

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2023 Ingenium Digital Health Advisors

Setup Variations

3

❖ Set up in Clinic

- Demonstration & teach back in Clinic
- Remote Test Transmission

❖ Set up at Home

- Community Health Worker, Community Paramedics, Home Health, Case Manager?
- Test Transmission

Don't:

- Send a self-service kit to the patient's home

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2025 Ingenium Digital Health Advisors

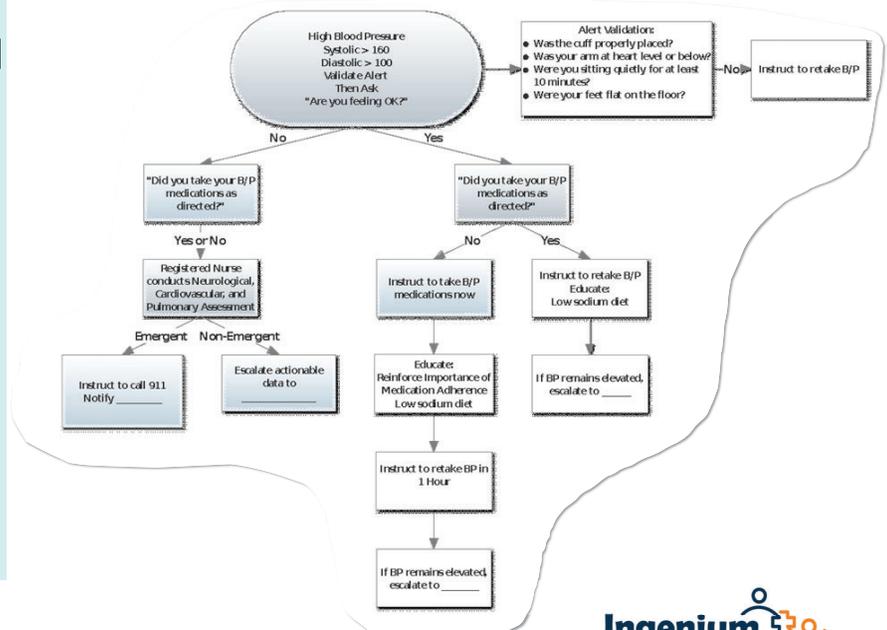

[4] Monitoring

4

❖ Daily Monitoring Protocol

❖ Workflows for Alerts

- No data collection
- Vital Sign too high/low
 - Alert Validation
 - Medication Protocol
 - Escalation Protocol

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2023 Ingenium Digital Health Advisors

[5] Recovery [6] Refurbishing

5

6

- ❖ Recovery
 - De-Enrollment
 - Equipment Recovery
- ❖ Refurbishing
 - Cleaning
 - Calibration

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2023 Ingenium Digital Health Advisors

[7] Post-Monitoring

7

- ❖ Periodic Patient Follow-Up
- ❖ Post monitoring Tracking

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-2023 Ingenium Digital Health Advisors

RPM Workflow Roadmap

(1) Identification

Qualify suitable patients. Assess clinical, psycho-social, technical factors.

(2) Enrollment

Create Order. Obtain consent. Initial training?

(3) Equipment Setup

Setup and verify equipment at patient's home.

(4) Monitoring

Continual monitoring. Resolution of issues. Escalation when warranted

(7) Post-Monitoring

Patient follow-up and/or tracking.

(5) Recovery

De-Enrollment. Equipment Recovery.

(6) Refurbishing

Cleaning and Calibration.

RPM Technology Options

COMMUNITY
HEALTH CARE
ASSOCIATION
of New York State

(c) 2020-23 by Ingenium Consulting Group, Inc.

Vendor Options

People

- process design & training
- monitoring staff
- patient training
- delivery
- home setup
- retrieval
- cleaning

Technology: Hardware

- vital sign devices
- transmission hub

Technology: Software

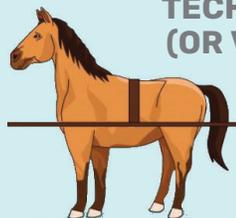

- patient dashboard, tracking and analysis
- EHR integration
- patient user interface
- patient communication (messages, video)

Let Workflow drive Technology!

- ☑ Don't put the horse behind the cart

WORKFLOW
(User Experience)

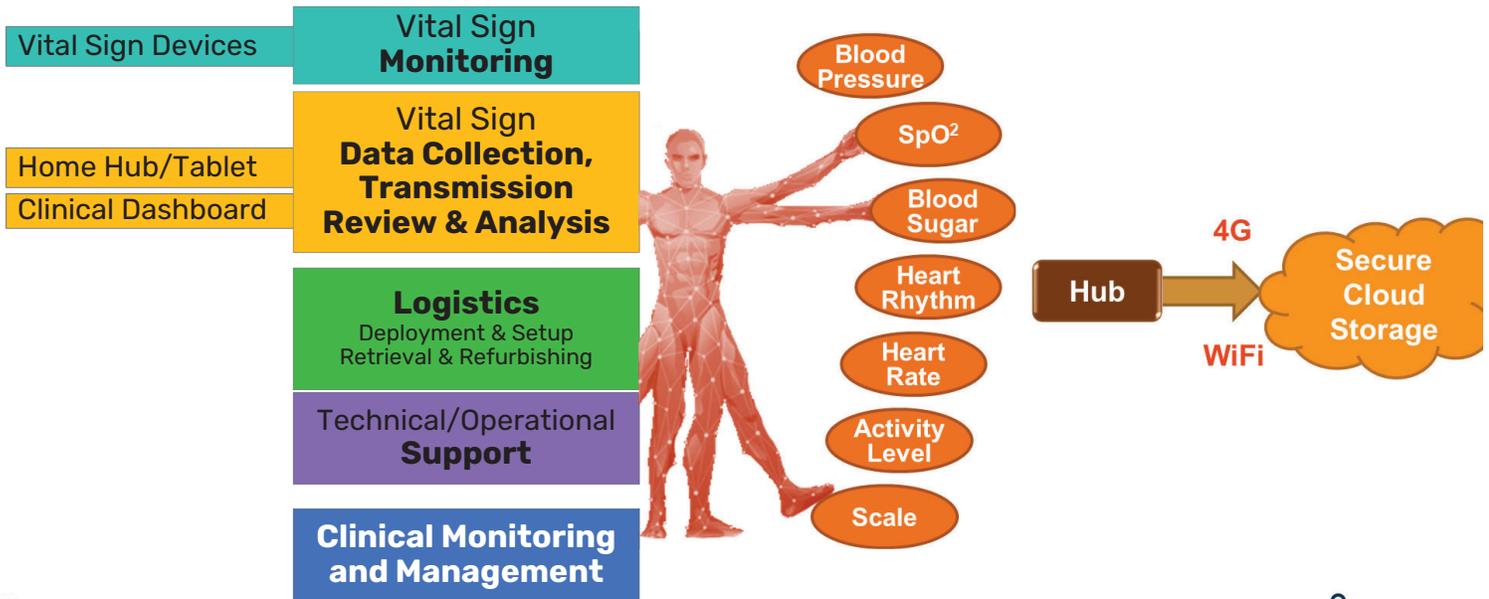

TECHNOLOGY
(OR VENDOR)

**Everybody Practices
on Top of their License!**
*“Do only the things
that only they can do.”*

- ☑ First, design your clinical, operational, and financial workflows
- ☑ Then select the technology or service that best fits your needs

RPM System elements

We'd Like Your Input!

...for an "RPM Optimization Toolkit"

Poll

1) What is the status of your RPM Program?

(select one)

- We never launched, we have no equipment
- We never launched, but we do have equipment
- We launched but it is no longer used
- We launched and utilization is very low
- We launched, utilization is good

Poll

2) Which areas of RPM do you find most challenging?

(select all that apply)

- Identification of Patients
- Enrollment/Setup of Patients
- Patient Engagement/Compliance
- Technology - Support & Troubleshooting
- Technology - Selecting/Using Monitoring Devices
- Technology - Selecting/Using RPM Dashboard
- Graduating Patients
- Financial Sustainability
- Clinical Efficacy
- Strategic Relevance

Please respond to the Poll

- 1) What is the status of your RPM Program?
- 2) Which areas of RPM do you find most challenging?

In the Chat, please add any additional comments or specific challenges that don't fit into these categories.

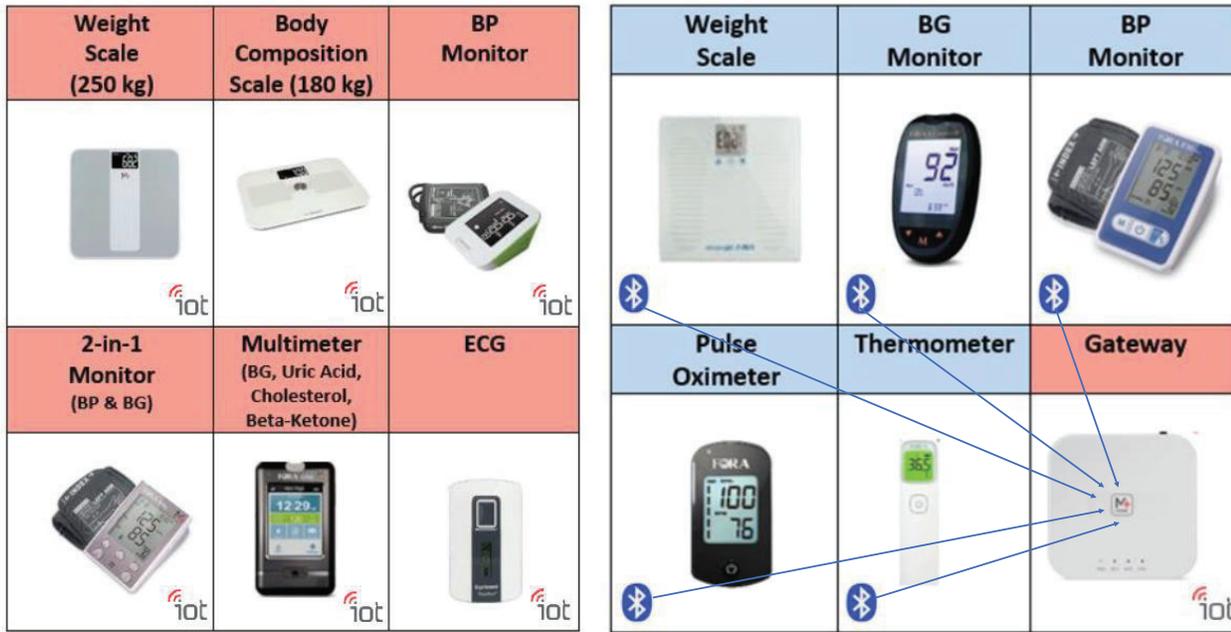

Vital Sign Monitors

Vital Sign
Monitoring

- ❖ Connectivity Options
 - Direct – 3G/4G, “Internet of Things” (IOT)
 - Bluetooth – “auto”-paired to hub
 - Bluetooth – manually paired to smartphone

Vital Sign Monitors

Vital Sign Monitoring

COMMUNITY HEALTH CARE ASSOCIATION of New York State

(c) 2020 by Ingenium Consulting Group, Inc.

Bluetooth vs. Cellular Vital Sign Devices

Vital Sign Monitoring

Bluetooth

- initially cheaper
- connects to Hub
- hub uploads via Internet or Cellular
- connection problems are common

Cellular

- more expensive
- data plan charges
- no hassle uploads w/ cellular coverage
- could result in greatly reduced support cost

COMMUNITY HEALTH CARE ASSOCIATION of New York State

Clinician Dashboards

Vital Sign
Data Collection,
Transmission
Review & Analysis

The image displays a variety of digital health tools. On the left, several desktop monitors and laptops show different views of clinician dashboards, including patient lists, vital sign trends, and detailed patient profiles. In the center, three smartphones display mobile versions of these dashboards. On the right, a large monitor shows a detailed patient dashboard with multiple line graphs for vital signs. Below the screens, several physical medical devices are shown, including a black blood pressure cuff, a white digital scale, a white glucose meter, and a white blood pressure monitor.

(c) 2020 by Ingenium Consulting Group, Inc.

RPM System Options

(c) 2020 by Ingenium Consulting Group, Inc.

RPM Monitoring Staff Options

	Clinical Activities	Logistics
Option A	Your RNs	Your Staff
Option B	Your RNs	Outsourced
Option C	Outsourced	
Option D	Your RN/Staff + Outsourced Backup	

Monitoring Nurse Considerations

- ❖ 1 FTE for approx. 150-200 patients (but 0.2 FTE for ~25 pts.)
- ❖ Various vendors to outsource your monitoring staff – escalating care to provider only when needed
 - Many vendors are tied to their own RPM solution (e.g., *Cadence Health, Optimize Health, etc.*)
 - Some vendors are technology-agnostic (e.g., *Reconnect4Health*)

PRO TIP

Prior to outsourcing, launch your program in house, but with outside expertise.

Making the Case

STRATEGIC CASE

Strategic
Case

**Defines the alignment with
“external” strategic objectives**

- Organizational Strategy
- Telehealth / Digital Health Strategy
- Grant Goals (e.g., HTN Management)

STRATEGIC CASE for RPM

Strategic
Case

**How does your RPM Service
align with your organization's
Strategic Objectives?**

- Services – e.g., expansion
- Quality – e.g., pt. outcomes
- People – e.g., pt. satisfaction
- Finance – e.g., revenue
- Growth – e.g., expansion
- Community – e.g., stewards of health

BUSINESS CASE

Business Case

Describes the business model:

- What is the **value** of delivering the service?
 - Financial – but also Strategic & Clinical
 - What is the revenue?
- What is the **cost** of delivering the service?
 - Hardware, Software Infrastructure
 - Staff, Legal, Advisory/Consultative
 - Launch vs. Operations
 - Capital Expenses vs. Operating Expenses

What is the **Return on Investment (ROI)**?

BUSINESS CASE for RPM

Business Case

Financial Value

- RPM Revenue
- Incremental Visits Revenue
- Any Penalties avoided or Shared Savings?
- Any indirect savings (avoided readmissions)

Non-Financial Value

- Patient Outcomes
- Patient Loyalty
- Other?

Cost

- Monitoring Equipment (pp)
- Monitoring Software Licensing Fee (pp/pm)
- Operational and Clinical Support Staff Time (pp/pm)

Return on Investment (ROI): Calculate for 3 years.

CLINICAL CASE

Clinical
Case

Looks at the solution through a Clinical Lens
(because clinical acceptance is key to success!)

- What is the **clinical efficacy** of the service?
 - Is this validated by research?
 - How will this improve health outcomes for patients?
 - How can this help with clinical acceptance?
- What is the clinical acceptance of the service?
 - How will this help clinicians to do their job better?

The
Permanente Journal

Benefits and Challenges of Remote Patient Monitoring as Perceived by Health Care Practitioners: A Systematic Review (Sep 2023)

Conclusion: Health care practitioners generally believe that RPM is feasible for application. Additionally, there is a consensus that telemonitoring strategies will become increasingly relevant. However, there are still drawbacks to the technology that need to be considered.

A systematic review of the impacts of remote patient monitoring (RPM) interventions on safety, adherence, quality-of-life and cost-related outcomes (July 2024)

Overall, RPM interventions have **positively impacted patient safety**, evidenced by **reduced major complications and adverse events**.

Outcomes on **adherence** are rather encouraging as well, with RPM interventions showing an overall **upward trend in patient adherence to medication and lifestyle prescription** as well as the odds of self-monitoring.

For **cost-related outcomes**, reduced risks of hospital admission/readmission, length of stay, number of subsequent follow-ups and non-hospitalisation costs are clearly observed.“

CLINICAL CASE for RPM

Clinical
Case

Patient Outcomes

- Better managed Chronic Diseases Hypertension, Diabetes, etc.
- Fewer ER visits, hospitalizations
- Fewer Readmissions
- Increased Patient Activation – more visits, prescriptions filled

Research Studies

- RPM is proven to “work”
- In my observation outcomes are greatly improved
 - when clinicians actively “enroll” the patient and remain engaged
 - when patients are actively engaged in the care
